Profile

As a **MERN stack developer** with over two years of experience, I specialize in building dynamic front-end interfaces using **React** and **Next.js**, and developing robust backends with **Express.js** and **MongoDB**. I have also expanded my expertise to include **NestJS**, **PostgreSQL**, and **Vue.js**, enabling me to deliver scalable, efficient, and modern web applications.

Education

2018 – 2022	Bachelor of Mechanical Engineering
Lahore, Pakistan	<i>University of Engineering and Technology</i>
2016 – 2018	Pre-Engineering
Lahore, Pakistan	<i>Punjab Group of Colleges</i>

Professional Experience

2026/03 – Present	Software Engineer
Lahore, Pakistan	<i>Issoftstudios</i> At iSoftStudios, I am working on mobile application development using React Native. My responsibilities include writing and maintaining code to ensure a consistent user experience across both iOS and Android platforms. I focus on building responsive, high-performance features while ensuring cross-platform compatibility and smooth functionality.
2025/04 – 2026/02	Software Engineer
Lahore, Pakistan	<i>Optimageeks</i> At Optimageeks , I work as a Software Engineer, contributing to full-stack development with a diverse tech stack. On the frontend, I have built dynamic and responsive applications using Next.js and Vue.js . On the backend, I leverage NestJS along with databases such as MongoDB and PostgreSQL . I design efficient schemas, optimize queries, and implement scalable APIs. In addition, I have worked on web scraping solutions using Puppeteer , automating data extraction and supporting data-driven workflows.
2023/09 – 2025/03	Associate Software Engineer
Lahore, Pakistan	<i>Elktech</i> At ElkTech , I worked extensively with React.js and Next.js, focusing on API integration and building functional, dynamic web applications. I implemented key features and optimized performance to create seamless user experiences. On the backend, I worked with Node.js and MongoDB, designing efficient schemas and leveraging aggregation pipelines to develop scalable and robust solutions.
